

others speak at the foot of the Lincoln Memorial in Washington, DC. He was there when Dr. King delivered his immortal "I Have a Dream" speech.

He was with Dr. King in 1966 when an angry mob jeered him in Chicago's Marquette Park neighborhood.

In 1983, Tim Black provided influential support to help elect another of his DuSable High School classmates, Harold Washington, the first African-American mayor of Chicago.

Some years later, a young community organizer who had just returned to Chicago with a Harvard law degree asked Professor Black to teach him about organizing people so they could create a better life for themselves and their children.

Over the years, Professor Black and that young organizer became good friends.

On January 20, 2009, it was my privilege to invite Professor Black and his incredible wife, Zenobia Johnson-Black, to be my guests as that community organizer swore an oath to become President of the United States of America—Barack Obama.

My friend, Paul Wellstone, had a beautiful definition of politics. He used to say: In the last analysis, politics is not predictions and politics is not observations. Politics is what we do. Politics is what we create, by what we work for, by what we hope for and what we dare to imagine.

Dr. Timuel Black has witnessed injustice and inhumanity, but he has never stopped working to believe in a better world, and he has never stopped working to make that world a reality. He is a true inspiration, a Chicago treasure, and an American hero.

REFUGEE ADMISSIONS

Mr. LEAHY. Mr. President, last Friday, President Trump announced that he will slash our refugee admissions to 45,000 in fiscal year 2018—the lowest annual target since the passage of the 1980 Refugee Act. Instead of embracing our moral and legal obligation to address the worst refugee crisis in global history, as has been our tradition for decades, President Trump seems intent on relinquishing our role as the humanitarian leader of the world. The dimming of our beacon is not just a symbolic loss; tens of thousands of human lives are now placed at risk.

There is no rational basis for this shameful retreat. The administration's own analysis shows that refugees contributed a net benefit of \$63 billion to our economy between 2005 and 2014. National security leaders across the political spectrum, including former Chairman of the Joint Chiefs of Staff, Admiral Mullen, are unanimous in their view that refugees are the most stringently vetted travelers to the United States. Our commitment to welcoming refugees plays a critical role in strengthening our alliances in areas of conflict.

The President stands alone in his disregard for the staggering suffering we are witnessing around the world. Last month, the Senate Appropriations Committee—on which I serve as vice chairman—unanimously approved a funding bill that demonstrates our unwavering commitment to refugees. It fully funds offices that are critical to the continuity of refugee programs and even provides a \$50 million increase to the State Department's refugee assistance and resettlement missions. Our bipartisan bill repudiates any claims by President Trump that the United States is unwilling to commit the resources required to fund a refugee program that honors our history as a refuge for the persecuted. Even the conservative Heritage Foundation has called on President Trump to set annual refugee admissions "based on historical refugee levels," which have never dropped below 67,000 per year since the beginning of the Reagan administration.

I am proud that my own State of Vermont has welcomed and resettled approximately 7,500 refugees since fiscal year 1989. The city of Rutland was preparing to resettle an additional 100 refugees mainly from Syria last year and this fiscal year, until the Trump administration inexplicably halted certain refugee admissions and announced drastic reductions to the refugee resettlement program. Vermont and other States stand ready to do more to address this global crisis, but the leader of our country is shamefully directing them to do less.

Presidents have an obligation to protect our Nation's fundamental values. Presidents of both parties have long understood this. They have not forsaken our history as a nation founded by enterprising individuals seeking refuge and freedom from persecution. They have ensured that our policies do not betray our proud tradition as the humanitarian leader of the world.

This decision illustrates that President Trump is misinformed and that he has caved to the counsel of xenophobic voices seeking to hollow out our refugee program. By shutting our doors to thousands of innocent human beings fleeing persecution and tyranny, he misunderstands the history of the country he was elected to lead. I hope that he reconsiders his callous decision, as the law in fact empowers him to do, in light of emerging humanitarian concerns. Nothing less than our Nation's identity as an unwavering beacon of hope during the world's darkest chapters is at stake.

TRIBUTE TO RAINER WEISS, KIP S. THORNE, AND BARRY C. BARISH

Mrs. FEINSTEIN. Mr. President, today the Royal Swedish Academy of Sciences announced the awarding of the Nobel Prize in Physics to Rainer Weiss, Kip S. Thorne, and Barry C. Barish for "decisive contributions" to the observation of gravitational waves.

This landmark discovery marks a giant leap forward in human knowledge, and I salute these Americans on their honor.

Over 100 years ago, Albert Einstein predicted that massive objects and energy could distort space-time. In order to detect these "ripples" in the fabric of space and time, known as gravitational waves, scientists worked over many years to develop the Laser Interferometer Gravitational-wave Observatory, or LIGO.

On September 14, 2015, scientists working at LIGO detected a "chirp"—a ripple in space-time. What was observed because of LIGO was the result of two massive black holes merging together over 1.3 billion light years away. This breakthrough discovery means that we now have an entirely new way of observing the universe.

This achievement would not have been possible without the leadership of Dr. Weiss, Dr. Thorne, and Dr. Barish, along with the countless scientists who helped with the project, including the National Science Foundation.

Two of the distinguished recipients hail from my home State. Dr. Thorne and Dr. Barish are professors at the California Institute of Technology, and I am proud of the role that Cal Tech played in making this discovery possible. I also recognize Dr. Weiss, a Massachusetts Institute of Technology professor, for his achievement.

On behalf of all Californians, I commend these physicists on a well-deserved honor and for all that they have done to push our knowledge of the universe forward. Let us hope that this discovery will continue to expand the horizon of human knowledge and lead to new efforts in humanity's never-ending quest for enlightenment.

Again, I congratulate these three distinguished Americans and their families on this remarkable discovery and prestigious award.

TAIWAN'S 106TH NATIONAL DAY

Mr. WYDEN. Mr. President, a week from today, on October 10, the Taiwanese people will celebrate their 106th Taiwanese National Day. I would like to take a few minutes to congratulate my Taiwanese friends on this important occasion.

Taiwan has long been a trusted friend of the United States and a valuable partner in the increasingly important Asia-Pacific region.

Taiwan is hugely important to Oregon. It is also one of Oregon's largest trading partners and a big export market for Oregon products like grain. Portland's annual Grand Floral Parade and Rose Festival host delegations from Taiwan. Portland, OR, and Kaohsiung, Taiwan, are sister cities.

These ties are both broad and deep, as I saw myself when I visited Taipei several years ago.

That was more than a year before Taiwan's historic 2016 election, but the Taiwanese people's commitment to democracy was already very much on display.
